It also cleans up the search history from the browser. Thus, if the history from the browser is stored on your PC, then CCleaner will help you clear the history. You can also clean the temp, saved documents, images, audio, video, and various other files from your PC to free up the storage. CCleaner also fixes the registry and removes unwanted programs from your computer. These include a list of unwanted programs along with the name, file size, and date where it was installed. You can start the scan manually or automatically, and you can schedule the scans. Furthermore, CCleaner helps you to increase your PC's performance and security. CCleaner also helps you to defrag the hard drive to free up the storage space and prevents your system from getting slowed down. CCleaner Business Edition Help: CCleaner Business Edition comes with a guide that covers the features of the software. It is divided into four sections. The first section includes the introduction to CCleaner, where it will tell you the purpose of the utility. The second section shows how CCleaner can protect you against data theft, how you can fix junk in your system, and how you can extend its storage space. The third section gives you the features of various types of cleaning, and the last section tells you how to uninstall CCleaner and remove it from your computer. "Hackers and malware authors are running their scams and games again in 2016. The year is already the busiest yet for threats
