This was a program feature in the first version, but in the. All of the new applications have been rewritten in C#, which is.Q: "not so same as" vs. "not so different from" I've seen "not so different from" and "not so same as" used interchangeably and thought it might be confusion since different and same are basically interchangeable, but maybe a grammatical issue. A: The two phrases are not synonymous. Not so different = much the same, similar. Not so same = quite the same. The difference is in the sense in which the phrases are used. A: 'Not so different from' suggests a similarity. It is often used in a context where the relationship between two things can be roughly summarized as a binary opposite, and where both things could have been characterized with the other phrase. 'Not so same as' suggests a difference. The "Recovery" of "Vibrational" Excitation in Near-IR Ion-Channeling Spectroscopy. Resonant ion-channeling (RIC) spectroscopy is a hybrid technique that measures the spectrum of a resonance produced by the vibrational motion of the ions in a narrow energy window around the ionization potential. With standard RIC, the excitation energy is shared between the ion and the surrounding ions that are being ionized, thus leading to an apparently high quas
